

PROTASIS Company Profile

Your trusted partner in Engineering,
Consulting & Systems Integration

With a dedicated team of experts, we deliver reliable and sustainable energy solutions, tailored to meet the evolving needs of the energy sector, ensuring optimal performance and safety for every project

About us

PROTASIS Engineering & Consulting, headquartered in Athens, Greece, has been a trusted partner in High Voltage (HV) and Medium Voltage (MV) electric networks since 2002. We provide advanced power system studies, engineering services, and tailored solutions across generation, transmission, distribution and industrial sectors. With projects in over 30 countries across Europe, Africa, and the Middle East, we combine technical excellence with global experience.

Our team of 130+ professionals combines extensive industry experience with strong academic backgrounds and a young, innovation-driven mindset, enabling us to progress together.

Our mission

Our mission is to empower our team and clients to reach their fullest potential. Adhering to our quality and ethical standards, we aim to provide reliable electrical solutions and engineering studies, delivering value-added services and systems to every customer. With a commitment to continuous improvement, we aspire to be a trusted energy partner and the preferred choice for future generations.

Our vision

“To create technical excellence, through our innovative approach, connecting engineering to life for a brighter future.”

The company’s motto, **“With Power, We Perform”**, embodies our commitment to advancing the energy sector while valuing our most significant asset - our people.

Driving your Energy forward

What we can do for your business

- Engineering studies and consulting
- Tailor-made solutions for energy automation and smart grids, OT cybersecurity, smart applications and services for e-mobility providers
- On-site services
- Training and after sales services

Our customer-centric culture drives us to embrace new challenges and developments, continually aligning our technology portfolio with the rapidly evolving energy sector.

Markets we serve

- Power Generation & Renewables
- Transmission & Distribution
- Heavy Industry and OGP
- Infrastructure and Data Centers
- Smart Cities

Our signature on emblematic projects

For more than 20 years, we have contributed to major large-scale energy projects worldwide.
